

* Avro → A row-based binary format that includes its own schema.

⑪ AI - is a tool(s) that enable us to do things/work faster and easy.

- It differ from programming in the sense that programming you are telling the programme how to do things using coding language while AI you are using normal spoken words to tell it what to do.

eg* AI → Telling chatgpt to design a website for you.

* programming - using coding language to programme a motor to operate at a certain time.

⑫ Machine learning is a subset of Artificial intelligence that allows computer systems to learn from historical data and identifies patterns without being explicitly programmed.

⑬ Machine learning does not need human interaction it operate on its own.

⑭ programming rely on a human being to enter codes on it.

⑮ Deep learn is an advanced subset of AI that teaches computers to learn by example.
