

(16) Generative AI → is a form of artificial intelligence that creates entirely new, original content. e.g music, image, text.

④ ChatGPT - it answers questions, writes essays, debug code, create website.

④ Claude is a state of the art text and reasoning tool, it is used to analyze big documents, summarize reports etc

④ DALL-E - is an image-generation model, it takes simple or highly descriptive text prompts and generates high-quality artworks (Coursera.org.)

(17) Training database is a collection of information used to teach an AI or machine learning model.

→ Why quality matters

- It is important to ensure accuracy and efficiency.

→ When the training data is biased or incorrect the philosophy of 'garbage in, garbage out' will apply.
