

Data governance framework.

- ④ Goals & strategy: clearly defined business objectives outlining why the governance program exists and what value it aims to deliver.
- ⑤ Roles & Responsibilities: A defined organization structure assigning data ownership and accountability, typically featuring a data council, data standards and data custodians.
- ⑥ Policies & Standards: The written rules and guidelines that dictate how data is created, stored, accessed and disposed of.
- ⑦ Data quality: Metrics, rules and procedures established to ensure data is accurate, consistent and reliable for business intelligence and decision-making.
- ⑧ Data security & Privacy → protocols and access control to protect sensitive information from unauthorized use while ensuring compliance with local and international privacy regulations.
